MAXIM BRANDT

Across the works featured in *Good News*, a kind of symbology plays out, in terms of which Maxim Brandt's landscapes reveal themselves. The viewer intuits space as a kind of disquieting intimacy—a felt tension between interiority and exteriority, place and architecture. The scenes Brandt depicts seem foreign to anything recognisably domestic. Simultaneously, the overlapping aspects of fantasy and surrealism captured in his impersonal world invoke a levity that seems equally pacific and strange, utopian and absurdist. *Good News* speaks to a greater ecological consciousness of not feeling at home in this world, while intimating how technology and nature can symbiotically converge.
